## High Level Requirements

The proposed solution is to develop a responsive Arabic/English corporate website. The site will be integrated with a centralized CMS with modules developed on top of Django Framework this will allow the admin users to have full control over the content, and media of the website, and with the features described below.

## Header

Ident in Foreign Currency | Kuwait Clearing Company will stop providing its services to our esteemed clients until further notice | Deactivation of individual corporations trading accounts | Kuwait Clearing Company will stop providing its services to our esteemed clients until further notice

Element	Action	Frontend Functionality	Backend Functionality
Ticker Bar		Information	Editable from backend
Site Search Bar	OnClick	Search field will be activated where users can search by inserting keywords.	
Clickable Phone Number	OnClick		click-to-call
Language Selector	OnClick	If on English Version, Arabic version is loaded and Arabic text will be displayed.	The website will be made in 2 languages – English & Arabic. By default, Arabic version of the website will load for Kuwait and other GCC countries. Outside GCC by default Website will load in English.
Logo	OnClick	Navigates to the homepage	Editable by admin
Main Menu	OnClick	Navigates to the assigned page	Manageable (Edit/Add/Delete) by admin

## Footer

Element	Action	Frontend Functionality	Backend Functionality
Copyright		Text	Editable by admin, and there will be auto increment for the year.
Social Media icons	OnClick	Navigates to the social media accounts of KCC	Link editable by admin
Logo 1		Navigate to the external link	Logo and Link editable. The preferred size for the logo will be mentioned in Admin.
Logo 2		Navigate to the external link	Logo and Link editable. The preferred size for the logo will be mentioned in Admin.

## Search

Once the user starts typing for a keyword, the auto fill text will suggest the keywords.

If the spelling is wrong, the search will suggest keywords that are a potential match. The results must cover all the pages, contents & even labels throughout the website.

If in case there are no results related to the searched keyword, then it must display a message, 'There were no results found for 'keywords typed'.

## 404 Page

## Announcement pop up

Admin can enable and disable pop up notification added for announcement. Image, Title and Text can be managed from the admin panel.

## Standard CMS Page

The standard CMS page & the contents of this page will be manageable from the admin panel. The contents of the page will be manageable from the admin panel via a rich text editor, in both English and Arabic languages.

## User Authentication in Django

Django comes with a user authentication system by default & works out of the box. It handles user accounts, groups, permissions and cookie-based user sessions. This needs to be implemented so that different users can be created with different user access permissions for updating content on the admin panel. This includes Maker and checker permissions. Where in, one user will add content and another user can publish the data.

## Image Automatic Optimization

Images inserted from the admin need to be optimized properly to be shown on the website so that the page is not heavy to load.

### Approval

**Notice** – This System requirements specification has been drafted in consultation with the customer and has taken inputs from clients discussions, sales meetings and proposal documentation including and excluding points from the same based on mutual agreement. It is presumed that the documentation of features in this requirements documentation will serve as the final guideline for implementation of the project irrespective of documentation shared earlier and is being approved by the beneficiary below. All discussions done in meetings, over emails, calls or any other type of conversation needs to be checked in the SRS by the customer. This SRS will be the final document that will be used for development. Nothing outside this document will remain valid once this document is signed by the beneficiary below. Any Change/Modifications to the scope of the project documented in this specification must be intimated to KUWAITNET before signing off for the same.
